TECHNICAL SKILLS

Languages: Python, SQL, C++

Machine Learning & Deep Learning: Supervised Learning, Logistic Regression, Decision Trees, Random Forests, SVM, Gradient Boosting, Model Evaluation

ML Frameworks & Libraries: Pandas, NumPy

Data Skills: Data Preprocessing, Feature Engineering, Feature Selection, Data Cleaning

Core CS and Fundamentals: Data Structures & Algorithms (DSA), OOP, DBMS

Tools and Platforms: Git, GitHub, VS Code, Jupyter Notebook

WORK EXPERIENCE

AI/ML Engineer (Virtual Internship)

Jun 2025 – Dec 2025

SmartBridge & Google for Developers

- Developed and evaluated 5 supervised ML models (logistic regression, decision trees, random forests, SVM, Gradient Boosting) in Python, including an anemia-prediction classification system built during the internship.
- Applied the full ML pipeline: data preprocessing, feature engineering, model training, hyperparameter tuning, and performance evaluation using accuracy, precision, and recall.
- Used Git/GitHub for version control and structured, iterative experimentation, following ML engineering best practices.

UI/UX Designed

Jul 2024 – Oct 2024

Grootz

- Designed a 5-page project website and a matching 5-page wireframe set within a 15-day timeline, translating requirements into intuitive layouts.
- Created interactive UI/UX workflows across all 5 pages to support smooth front-end navigation and usability.
- Collaborated on delivering a consistent, user-friendly interface, coordinating design decisions with development needs.

PROJECTS

Anemia Detection System

2025

Python, Scikit-learn, Pandas, Machine Learning

- Engineered a supervised ML model for anemia prediction, achieving 92% accuracy, 90% precision, and 88% recall using patient health parameters.
- Optimized classification model performance by 15% through advanced feature engineering and hyperparameter tuning on large datasets.
- Processed and analyzed 1000+ patient records, performing data cleaning, normalization, and feature extraction with Pandas and Scikit-learn.

Plant Pest Detection (Image Classification)

2025

Python, Machine Learning, Image Processing

- Built a dual-model deep learning pipeline (MobileNetV2 image-validation gatekeeper + YOLO disease classifier) that achieved **95.8% validation accuracy** across **38 crop-disease classes** spanning tomato, potato, bell pepper, and more.
- Trained on an **80:20 split** of PlantVillage/Kaggle datasets; Engineered confidence-based decision logic (reject <35%, warning <60%, accept ≥60%) to filter unreliable predictions.

Internship Aggregator Platform

2025

JavaScript, Python, SQL, Git

- Developed a full-stack web platform that aggregates and displays internship opportunities from multiple sources in one place.
- Implemented search and filtering logic (DSA-based sorting/filtering) to help students find relevant listings quickly.

EDUCATION

ABES Institute of Technology — B.Tech, Computer Science

2022 – 2026

SGPA: 7.1

ACHIEVEMENTS

- Solved 250+ problems on LeetCode; earned the SQL 50 badge.
- Solved 100+ problems on GeeksforGeeks (GFG).

CERTIFICATIONS

- Virtual Internship Program — AI/ML Engineer, SmartBridge & Google for Developers (2025)
- UI/UX Design Internship Certificate — Grootz
- Java Programming Course (SICT Ltd.)
- Accenture Innovation Bootcamp (Hack2Skill) — Participation
